Energy use in Guinea-Bissau is roughly 0.3 toe per person per year, and is one of the world's lowest. The biomass represents over 95% of the total energy consumed by households in Guinea Bissau. Wood is the dominant fuel with a demand that exceeds 500,000 tons per year, followed by charcoal being the most-used fuel in the capital.

At Toyola Energy, our commitment to enhancing the lives of our customers while championing environmental sustainability has not only earned us a steadfast reputation but also numerous acknowledgments from respected platforms across the globe. We are proud to share some of our recent achievements and media features, each of which fuels our drive ...
