Global Energy Network Institute GENI's mission is to educate world leaders and the public about the critical viability of the interconnection of electric power networks between nations and continents, with an emphasis on tapping abundant renewable energy resources, what we call "the GENI Initiative."

Haiti has been hard hit by a series of crises in recent years, including political instability and insecurity, issues with food security and energy supply, and devastating consequences of natural disasters. The pandemic exacerbated the situation through reduced demand, disruption of supply for industries, and more difficult credit conditions and uncertainty. In the face of the global crisis ...

In addition to the benefits of clean energy, the two Haitian entrepreneurs hoped to employ and transfer skills to young people in a country where the jobless rate is estimated at 70 to 80 percent, and where, for those lucky enough to have a job, the minimum wage was raised last year from 1.75 to 5.50 dollars per day.

CO 2 emissions are dominated by the burning of fossil fuels for energy production, and industrial production of materials such as cement.. What is the contribution of each fuel source to the country's CO 2 emissions?. This interactive chart shows the breakdown of annual CO 2 emissions by source: either coal, oil, gas, cement production or gas flaring. This breakdown is strongly ...

A great deal of previous research has focused on oil and gas flows in which to analyze global energy networks based on complex network theory (see Section 1). We would therefore like to make a comparative study between an HQ subsidiary network and a trade network. Here, we obtained oil flow data from the United Nations trade database and the ...
