Abstract The need for energy storage solutions and technologies is growing in support of the electrification in transportation and interest in hybrid-electric and all electric heavy-duty vehicles ...

This paper investigates the development of a Series-Parallel hybrid electric vehicle powertrain for a heavy-duty truck based on vehicle performance requirements, and ...

A genetic algorithm was employed to optimize the system parameters, resulting in a Pareto front of the solutions for the hydraulic energy storage system and torque distribution ...

The Hydrogen Storage Tech Team is one of 13 U.S. DRIVE technical teams that work to accelerate the development of pre-competitive and innovative technologies to enable a full ...

This chapter, based on the NEV access characteristics on the National Monitoring and Management Platform and also the data in the national announcements related ...

Electrical and Electronics Tech Team is one of 13 U.S. DRIVE technical teams that work to accelerate the development of pre-competitive and innovative technologies to enable a full ...

1.0 Background: Hydrogen (H₂) storage is a key enabling technology for the advancement of hydrogen vehicles in the automotive industry. Storing enough hydrogen (4-10 kg) onboard a ...

Relevance/Potential Impact This project addresses technological gaps for medium and/or heavy-duty fuel cell electric truck storage systems in terms of high flow rate fueling data, high flow rate ...

Key figures for battery storage systems provide important information about the technical properties of Battery Energy Storage Systems (BESS). They allow for the comparison of ...

Heavy industry energy storage vehicle technical parameters

Thus, this study provides an important reference and basis for the performance and energy-consumption optimizations of FC hybrid heavy-duty trucks in the future. ...

This paper provides a comprehensive global analysis of charging station infrastructure, exploring international standards and regulations, various charging modes, the ...

Prior research has considered metal amides as storage materials for light-duty vehicles but not for heavy-duty applications. The project established the basis for further development of storage ...

This study investigates the economic viability of various medium- and heavy-duty battery-electric and hydrogen fuel cell vehicles compared to their diesel equivalents from 2020 ...

A review of coordinated and uncoordinated charging of EVs considering technical and ecological factors is highlighted in [19]. State of the art on charging standards, control ...

2. Clean air in China: an environmental imperative Renewable clean energy for vehicles and other applications is already growing faster in many developing nations than in ...

For vehicles with a payload of up to 1000 kg and a gross vehicle weight of no more than 3.5 t, mobile energy storage facilities will have a capacity of about 150 kWh, while ...

DOE Technical Targets for Advanced Truck Technologies key activity within DOE's Office of Transportation within Energy Efficiency and Renewable Energy (EERE) is setting technology ...
