

Hitachi energy as Papua New Guinea

What is Hitachi energy doing in Indonesia?

To help stabilize and secure the nation's power supply system, Hitachi Energy in Indonesia has been involved in several energy-transition projects, such as deploying Grid Edge solutions across the country, including the first and largest microgrid facility of a mining company in Bontang.

Who is Hitachi energy?

Hitachi Energy is a global technology leader that is advancing a sustainable energy future for all. We serve customers in the utility, industry, renewables, data center, transport and infrastructure sectors with innovative solutions and services across the value chain.

What is Hitachi energy's high-voltage direct-current system?

Hitachi Energy's high-voltage direct-current systems are used to transmit green electricity from offshore wind farms back to power grids. (Photo courtesy of Hitachi)

Is Hitachi preparing for a recession?

(Photo courtesy of Hitachi) TOKYO -- With a global economic slowdown looming over the horizon, Hitachi is shifting focus to areas considered relatively safe from recessions, such as decarbonization and digital services, President and CEO Keiji Kojima told Nikkei.

Why should you choose Hitachi parts?

We guarantee that these parts have high performance and long life. Hitachi manage around 1,000,000 types of parts all around the world. They are designed and built to be the best match for your Hitachi equipment. We offer you the ability to keep your equipment serviced and repaired on site by experienced field service technicians.

What are Hitachi excavators?

Hitachi excavators are engineered and purpose-built for the toughest construction jobs, with the smartest design and most technologically advanced features. Hitachi trucks move material in a safe and efficient manner, while operating at the lowest total cost.

Hitachi Energy wraps up the rebranding of the former South Boston ABB plant as it installs new signs, solidifying its connection to the community and showcasing its commitment. Hundreds of employees and community partners participate in the signing event, marking an important milestone in the transformation process.

The advent of artificial intelligence is revolutionizing data center infrastructure, significantly influencing deployment speed. Key changes include increased rack density, necessitating higher voltage power supplies and larger transformers, with many organizations now constructing their own substations.

About Us. Hitachi Energy is a global technology leader that is advancing a sustainable energy future for all. Size: 10,000+ employees Industry: Engineering, Manufacturing, Technology, Energy View Company Profile

The latest investment is in addition to a previously announced \$3bn, which is allocated for advancing the electrification of the energy system amid the ongoing energy transition. Hitachi Energy Transformers Business managing director Bruno Melles said: "The demand for transformers and electrical equipment has grown at an unprecedented scale ...

Acessórios para cabos Capacitores e filtros Communication Networks Sistemas de resfriamento Desconectores Energy Storage Sistemas de Transmissão de Corrente Alternada Flexíveis (FACTS) Disjuntores para geradores (GCB) Chave seccionadora e disjuntores de alta tensão Corrente contínua em alta tensão (HVDC) Transformadores de instrumentos Isolamento e ...

Hitachi Energy, a global leader in technology for sustainable energy, has reached a significant milestone with the grand opening of its Transformers Factory in Bac Ninh, Vietnam. With over 30 years of history, Hitachi Energy has been a key player in supporting Vietnam's infrastructure and industry, contributing more than 30 percent of the country's ...

The global power system of 2050 will require four times today's generation capacity and will need to transfer three times as much electrical energy. This transition requires a new energy system approach because the future power system will have larger size, be more interconnected and will bring more complexity.

As a new addition to Hitachi Energy, eks Energy offers advanced, best-in-class power electronics integrated with advanced control and digital capabilities, as well as energy management solutions for storage and renewable integration. These power conversion systems meet grid operators' high performance standards to meet accelerated, global ...

The PNG Biomass project is aligned with the Papua New Guinea (PNG) Government's ambition to diversify the country's energy mix and complement the drive to create jobs and long-term opportunities for the people of PNG. The project will provide more than 500 direct jobs and stimulate many more across industries in the region.

Hitachi Energy is investing \$330m to expand and modernise its flagship factory in Ludvika, Sweden and establish a new campus in Vasteras, Sweden to enhance product portfolios. The Ludvika site will grow by more ...

Hitachi energy as Papua New Guinea

Hitachi Energy has announced a new collaboration with Tirreno Power to install Italy's first eco-efficient 420kV SF6-free circuit-breaker at the Torrevaldaliga Sud Power Plant, located near Rome. The project is set to replace aging equipment at the power plant, with installation expected to begin in 2025. The new solution, manufactured at Hitachi Energy's ...
