

Home storage electric enters the energy storage business

Why is energy storage important?

Energy storage is essential for creating a cleaner, more efficient, and resilient electric grid. Additionally, these projects will provide meaningful benefits to Disadvantaged Communities and Low-to-Moderate Income New Yorkers. Energy storage is essential to a resilient grid and clean energy system.

Should energy storage be included in the electric grid?

Integrating storage in the electric grid, especially in areas with high energy demand, will allow clean energy to be available when and where it is most needed. As New York continues to invest and build a cleaner grid, energy storage will allow us to use existing resources more efficiently and phase out the dirtiest power plants.

What are the benefits of a residential storage system?

Residential storage: Primarily used for home resiliency to deliver back-up power, these systems can also shift energy consumption to off-peak hours and integrate home solar for a low-cost clean energy supply. Residential storage systems can be eligible for Inflation Reduction Act tax credits.

What is New York's energy storage goal?

New York's Climate Leadership and Community Protection Act (Climate Act) codified a goal of 1,500 MW of energy storage by 2025 and 3,000 MW by 2030. In June 2024, New York's Public Service Commission expanded the goal to 6,000 MW by 2030.

Which energy storage projects are using lithium-ion Bess technology?

Just over 70% of the successful projects in the first window of the UK's long-duration energy storage (LDES) scheme are using lithium-ion BESS technology. RWE Renewables Australia has successfully registered Australia's first 8-hour duration battery energy storage system (BESS) with the Australian Energy Market Operator (AEMO).

Is the Baltics a good place to invest in battery energy storage?

The Baltics is among the most attractive regions in Europe for battery energy storage system (BESS) investment right now, with the recent decoupling from Russia and increasing renewable energy use sending flexibility needs soaring.
