Haha. 2 days with only 2 batteries. Tesla is pretty funny. That may be if you only run critical loads on them, not a whole house. My one battery when powering the whole house only lasts a bit over 3 hours, the biggest power drain being the air conditioner.

At 408 pounds, a 13.6 kWh aPower battery is significantly heavier than comparable models. For example, at 359 pounds, LG's 14.4 kWh HBC battery is over 50 pounds lighter. It's also notable that 13.6 kWh is the only battery size offered in the Franklin Home Power system, so it's tough to build the system to a precise size. LG ESS Home 8
