How does a villagrid battery storage system work?

Your system connects to an inverter which converts the DC energy stored in your VillaGrid battery storage system and converts it to usable AC energy that your home appliances can use. The VillaGrid allows you to avoid peak hour charges, reduces your dependence on the energy grid and keeps you running in the event of an outage.

Do you need a backup battery for a solar energy system?

To capture all the electricity produced by a set of solar panels, backup batteries are essential in every off-grid solar energy system's operation. Whenever new solar power cannot be generated on cloudy days, under snow, or at night, energy stored in a battery can ensure a continuous supply of electricity on-site.

Is the villagrid battery a reassurance?

The VillaGrid battery is ready to be a reassurance for homeowners who are impacted by evolving climate. Working hard to provide our customers with reassurance about the comfort of their home.
