

Which companies are positioned to benefit from hydrogen?

The index tracks various companies that are positioned to benefit from hydrogen production, storage, and transportation as well as fuel cell technology, including industrial companies, utilities, basic materials, and energy companies. The largest individual contributor was the US utility Entergy ETR.

Is hydrogen a good investment?

Air Liquide, Air Products, and Linde all have a wide moat. Hydrogen will play a key role in the energy transition, as a clean energy source that helps industry to decarbonize. Despite the hype, hydrogen investors have suffered setbacks in recent years, and the sector continued to lag the broader market this year.

How much money is spent on hydrogen supply projects in 2023?

In 2023, USD 3.5 billion was spent globally by project developers on hydrogen supply projects that are under construction. Around 80% of this was for projects building electrolysis facilities and the rest on projects coupling hydrogen production with carbon capture, utilisation and storage (CCUS).

Will CCUS-equipped hydrogen projects increase in 2024?

Spending on CCUS-equipped hydrogen projects was highest in North America. Investment spending on electrolysis projects could rise by as much as 150% in 2024, based on recent FIDs. Spending on CCUS-equipped plants will also increase in the coming years.
