

Iceland solar for business program

Who produces electricity in Iceland?

There are three main electricity producers: Landsvirkjun, which is state-owned; Reykjavík Energy, owned by three municipalities; and HS Energy, owned by local municipalities and private investors, some of whom are foreign. There is a nascent wind power sector and some interest in developing solar power, especially for off-grid uses.

How to start a business in Iceland?

When you are starting a business in Iceland there is a lot more support that you would need in Iceland, lots of services related to cover you for regulations in Iceland, which may help you in your success! Financial Licensing Virtual Office VoIP - Virtual Numbers CRM Solutions Trademark Registration Logo Designing Custom Website Financial Licensing

Why is Iceland a good place to start a business?

Leverage your natural renewable resources: As an island nation rich with hot springs, and a volcanic one as well, Iceland's geography lends itself to an abundance of clean, renewable hydropower and geothermal power, which its government and intrepid entrepreneurs have leveraged.

Is Iceland a good place to start innovation?

A small country, about the size of Kentucky, with a population of about 370,000 people, and a young one, having only gained independence in 1944, Iceland can serve the rest of the world by being the proverbial early stage innovation hub. That's how all innovation starts: with someone taking the first steps on a small scale.

How can a small circular economy work in Iceland?

Collaborate across sectors: One of the unique strategies in Iceland are these multi-use facilities that are small circular economies of their own, which I'll describe in another Forbes article. One of those facilities has Iceland's ground-breaking carbon capture technology, Orca.

Does Iceland absorb technical risks?

Government funding that absorbs the technical risk is critical: Iceland has a fund that provides grants and loans, believing that it's government's role to absorb the initial technical risks.

Buy or Invest in a Business in Iceland. Luxury guest house for viewing the Northern Lights with 85% occupancy rate and 10 beds.
