

Indonesia hepa global energy

This shift can reduce air pollution, improve public health, and leverage Indonesia's significant renewable resources while creating jobs in sustainable industries and stabilising long-term energy costs as global demand for clean energy grows. However, ambition waned in the final years of the Jokowi administration.

Hiswara Bunjamin & Tandjung in association with Herbert Smith Freehills has a dedicated project development team in Indonesia, with its energy, natural resources and infrastructure practice handling both transactions and projects, including financing. Current Global Energy Situation In this section, the current global energy situation is described as background for this report. Although the 2021 United Nations Climate Change Conference (COP26) increased momentum towards carbon neutrality in many countries, the Russian invasion of Ukraine in 2022 caused a global energy crisis.

Energy is linked to many of the sustainable development priorities, including public health, gender equality, food security, clean water, education, economic growth, youths' and women's empowerment and climate action. HEPA membership and work plan development: HEPA is a voluntary, multistakeholder network serving as a mechanism for
