

Does Botswana have a good electricity supply?

According to Statistics Botswana, local electricity generation and distribution has showed a slight improvement, increasing by 10.2 percent from 807,943 MWh during the fourth quarter of 2022 to 890,655 MWh during the first quarter of 2023. The increase was attributable to the performance improvement of Morupule A and B power stations.

Where does Botswana's electricity come from?

Prior to this period, most of Botswana's electricity was imported from South Africa's power utility, Eskom. In 2008 South Africa's electricity demand started to exceed its supply, resulting in the South African government restricting power exports.

Where does Botswana get its power?

In 2023, BPC agreed to procure up to 600 MW of power generation from a yet-to-be-built coal-fired power station. Additionally, Botswana imports the bulk of its power from South African utility Eskom, and the rest from Nampower (Namibia), Zesco (Zambia), and the Southern African Power Pool (SAPP), to make up for any production shortfalls.

How many coal-fired power plants are there in Botswana?

Besides the two coal-fired power plants, currently there are two other significant diesel-fuelled power plants in operation. The first is Orapa with a capacity of 90 MW. The second is Matshelagabedi, a diesel power plant with an installed capacity of 72.54 MW. In line with Botswana's NDP 11 two new renewable energy projects were identified.

Does Botswana have hydro power?

There is no hydro power potential in Botswana. The existing power generation system of Botswana is based on fossil fuels and consists of two coal-fired power plants and two diesel generators. The bulk of electricity produced locally comes from the coal-fired plant Morupule B, with the other coal-fired power plant being Morupule A.

Why does Botswana have a power supply problem?

As the SADC region was experiencing power shortage, private sector showed interest in investing on power generation. In 2007, legislation in Botswana was then liberalized to accommodate participation of private sector. Poverty and air pollutions also became imperative for Botswana to be considerate in her power supply development.
