What is influit energy?

Influit Energy aims to demonstrate the value and scalability of its nanoelectrofuel technology in various applications over the next two years, anticipating a serious consideration by 2025 or 2026.

How much does electricity cost in the BVI?

The 2015 electricity rates for BVI are of \$0.16 to \$0.24 per kilowatt-hour (kWh), lower than the Caribbean regional average of \$0.33/kWh. Like many island nations, the BVI is almost 100% reliant on imported fossil fuels for electricity generation, leaving it vulnerable to global oil price fluctuations that directly impact the cost of electricity.

What makes influit energy a good battery?

Influit Energy's nanoelectrofuel, an aqueous suspension, eliminates the risk of fires or explosions, ensuring safety and reliability. The battery's wide operational range and ability to be recharged with various energy sources make it a promising contender in the sustainable energy landscape.

Is the BVI reliant on fossil fuels?

Like many island nations, the BVI is almost 100% reliant on imported fossil fuels for electricity generation, leaving it vulnerable to global oil price fluctuations that directly impact the cost of electricity. Electricity Sector Data The British Virgin Islands Electricity Corporation (BVI EC) was formed by ordinance in 1978.

Energy intensity can therefore be a useful metric to monitor. Energy intensity measures the amount of energy consumed per unit of gross domestic product. It effectively measures how efficiently a country uses energy to produce a given amount of economic output. A lower energy intensity means it needs less energy per unit of GDP.

Influit energy British Virgin Islands

As of 2022, the electricity consumption in the British Virgin Islands is heavily reliant on fossil fuels, with 100% of its electricity being generated from these sources. This complete dependency on fossil energy means that there is currently no contribution from clean energy sources such as nuclear, wind, or solar ch reliance on fossil fuels not only contributes to climate change ...
