How to choose a BMS for lithium batteries?

If you are looking to build safe-high performance battery packs, then you are going to need to know how to choose a BMS for lithium batteries. The primary job of a BMS is to prevent overloading the battery cells. So, for this to be effective, the maximum rating on the BMS should be greater than the maximum amperage rating of the battery.

Can a loose lithium battery be shipped to Iraq?

Loose lithium batteries cannot be shipped to Iraq. Please purchase lithium batteries only if they are installed in, or shipped with, a device they power. MyUS is able to transport dangerous goods via DHL to Iraq, but DHL reports delivery delays for shipments containing these goods.

What is a lithium ion battery pack?

Lithium-ion battery packs are composed of many lithium-ion cells in a complex series and parallel arrangement. Many cells are needed when building a battery pack in order to provide the right amount of voltage, capacity, temperature, and current-carrying capacity characteristics.
