Will Iraq sell integrated air defense system?

WASHINGTON, August 5, 2013 - The Defense Security Cooperation Agency notified Congress today of a possible Foreign Military Sale to Iraq of an Integrated Air Defense System and associated equipment, parts, training and logistical support for an estimated cost of \$2.403 billion.

What is Iraq's air defense system?

By 2002 Iraq still maintained an integrated air defense system (IADS) of overlapping rings of surface-to-air missiles around Baghdad and Tikrit. However, in the no-fly zones air defenses consisted of anti-aircraft artillery and modified artillery rockets, with occasional surface-to-air missiles moved into unprepared sites for a short time.

What is LIG Nex1 doing in Iraq?

South Korea's LIG Nex1 has secured a significant contract with Iraq to supply mid-range surface-to-air missile defense systems. This deal, valued at nearly \$3 billion, marks another major success for the company in the global defense market.

Why should Iraq buy ground-based air defense systems?

This proposed sale of Ground Based Air Defense Systems will help the Government of Iraq to modernize its armed forces. The proposed air defense system will provide the Iraqi Air Defense Command situational awareness of the country's airspace and a baseline tactical radar and threat intercept capability.

Does Iraq use a Pantsir-S1 system?

The country has initiated discussions with various nations, although the details regarding potential vendors and the allocated budget remain undisclosed. The Iraqi Armed Forces use the Pantsir-S1 system for both short to medium-range air defense, as it combines missile and gun capabilities. (Picture source: Russian media)

Most mixing systems generate abundant turbulence, but in flow controlled mixing applications the strength of the bulk flow controls mixing efficiency. The performance of a submersible mixer is measured by the total amount of the installed thrust (N/Newtons) produced, which creates the strength of the bulk flow.

By John Lee. Iraqi news agency Basnews has reported that Iraq "urgently requested" eight missile defense systems from South Korea, valued at approximately \$2.5 billion. It says the systems are the "M-SAM-II", or "Cheongung II", which it describes as a robust defense system against aircraft, cruise missiles, and ballistic missiles. [More here.](#)

Much like the customers we serve and the problems we solve, Maxar has a diverse and complex history. Our evolution, however, has always been guided by a common purpose: advancing Earth Intelligence capabilities For A Better World.

The following is a list of equipment currently in use with the Iraqi Ground Forces. For a list of previous equipment, please see [List of former equipment of the Iraqi Army.](#)
