How much solar power does Iraq have in 2023?

According to the latest statistics by the International Renewable Energy Agency, it had just 1,599 megawatts of renewable energy capacity at the end of 2023. Iraq has abundant untapped solar resources that could allow it to achieve its target and reduce reliance on imports of electricity.

Does Iraq have a solar power plant?

The contracts also cover a water intake project for injection into oil reservoirs. The solar power plant will be Iraq's first utility-scale solar power project. While the country has several other solar plans in the pipeline, the TotalEnergies project is the first to proceed to the implementation phase.

Will Iraq reach 10GW of solar by 2030?

Iraq is aiming to reach 10GW of installed solar by 2030. Image: IRENA. French energy company TotalEnergies has revived its deal with the Iraqi Government to develop a 1GW solar PV project in the Basra region, part of a larger US\$10 billion accord to also establish new gas generation and seawater treatment facilities.

Why does Iraq have a poor electricity supply?

Iraq's inadequate electricity supply has been a drag on economic growth and a source of social instability. The problem is getting worse as the electricity supply is unable to meet rising demand due to rapid population growth. To make up the shortfall, Iraqis have had to resort to private generators that are expensive and cause pollution.
