What are electrical energy storage systems (EESS)?

Electrical energy storage systems (EESS) for electrical installations are becoming more prevalent. EESS provide storage of electrical energy so that it can be used later. The approach is not new: EESS in the form of battery-backed uninterruptible power supplies (UPS) have been used for many years. EESS are starting to be used for other purposes.

What is the IET Code of practice for energy storage systems?

traction, e.g. in an electric vehicle. For further reading, and a more in-depth insight into the topics covered here, the IET's Code of Practice for Energy Storage Systems provides a reference to practitioners on the safe, effective and competent application of electrical energy storage systems. Are energy storage devices dangerous?

energy storage devices can often supply significant short-circuit currents. Even at extra-low-voltage (ELV) this can present a serious risk of overheating and could lead to burns and/or fire. means of protection against electric shock may be exacerbated when the installation is operating off grid.

Can electrical inspections save lives & property?

Inspections Can Save Lives and Property: Inspections by qualified inspectors reduce the potential for fire and shock hazards due to incorrectly installed electrical products and systems covered by the National Electrical Code; save lives, and reduce property damage that may result from unsafe electrical installations.

Can thermal management improve energy storage performance?

With larger capacity energy storage installations, thermal management may prove cost-effective for improving performance and increasing time between maintenance replacements of batteries of certain technologies.

What types of electric services are no longer standard?

Electric services no longer standard include, but are not limited to: 25 Hz, two-phase systems, 2-wire 120V, 240V delta, 460V wye, 480V delta, 600V delta, 2400V, 4160V or 4800V services. Transformers rated at these non-standard voltages will no longer be provided by the Company.
