Nauru, like most Small Island Developing States (SIDS) in the Pacific region, has scarce local energy resources limited to solar energy and biomass and imports most of the energy consumed from abroad. To address this, the country has started the Supporting Mainstreamed Achievement of Roadmap Targets on Energy in Nauru project.

Nauru is a permeable island with very little surface runoff and no rivers or reservoirs. Potable water is collected in rainwater tanks from the roofs of domestic and commercial buildings. Water for non -potable uses is obtained from ...
