

Japan energy storage project investment

How big is Japan's energy storage capacity?

Global energy storage capacity was estimated to have reached 36,735MW by the end of 2022 and is forecasted to grow to 353,880MW by 2030. Japan had 1,671MW of capacity in 2022 and this is expected to rise to 10,074MW by 2030. Listed below are the five largest energy storage projects by capacity in Japan, according to GlobalData's power database.

What is Japan's energy storage policy?

As policy, technology, and decarbonization goals converge, Japan is positioning energy storage as a critical link between its climate targets and energy reliability. Japan's energy storage policy is anchored by the Ministry of Economy, Trade and Industry (METI), which outlined its ambitions in the 6th Strategic Energy Plan, adopted in 2021.

Can energy storage improve the reliability of Japan's grid?

"As Japan accelerates the development of renewable energy projects to meet its decarbonization goals, energy storage will have a crucial role to play in enhancing the reliability of the Japanese grid," said Ryan Chua, Senior Managing Director at Stonepeak.

How is Japan's energy storage landscape changing?

Japan's energy storage landscape is shifting, pushed by household demand, corporate ESG mandates, and domestic battery manufacturing. The residential lithium-ion market, projected to grow at a CAGR of 33.9% through 2030, remains one of the fastest-expanding segments.

Does Japan need energy storage?

Japan, like Britain, is an island country with relatively little interconnection to neighbouring states. That means it needs to balance and manage volatility within its own grid networks, and energy storage is a key technology to enable that, especially as rising shares of renewable energy will increase that volatility.

Does Japan have a battery subsidy program?

As Japan works to expand battery storage amid growing solar and wind capacity, METI also runs a similar subsidy scheme at the national level. In FY2024, it awarded 34.6 billion yen to 27 projects. Both programs are expected to continue in FY2025.

Construction is set to begin on a battery storage project in Japan through a joint venture (JV) involving CATL with utility Shikoku Electric Power. ...

The project, which is expected to be operational by 2027, will be one of the largest energy storage facilities in Japan, helping the country address the challenge of ...

Japan energy storage project investment

150kWh BESS in Japan could earn US\$150,000 a year from grid services These factors are leading to growing interest in the Japanese battery storage market, with ...

In Japan, one of the world's primary energy - and renewable energy- markets, as well as the current world leader in smart-grid and energy storage technology, the specific idiosyncratic ...

Japan has clarified investment policies and industry-specific roadmaps for its energy transition under the Basic Policy for the Realization of GX. Multiple plans (such as the Basic Hydrogen ...

The company is headquartered in New York and recently made its first investment in a 111MW/290MWh battery energy storage system (BESS) project in Australia, ...

The international market conditions and domestic policy shifts highlight the necessity for Japan to maintain a flexible and responsive energy strategy to balance its immediate energy security ...

2 · Port Inc. is considering expanding into the grid-scale battery storage business, the Tokyo Stock Exchange Growth-listed sales and marketing ...

1 · A total of 27 projects was awarded 34.6 billion yen in subsidies through METI's FY2024 program for supporting the expansion of renewable energy ...

Alternative investment firm Stonepeak and Singaporean battery energy storage system (BESS) project development and electricity data management company CHC have ...

Sumitomo Corp plans to install 500 MW of battery energy storage in Japan by 2031 to stabilize the supply of renewable energy and improve the efficiency of ...

2 · A total of 12 projects totaling 180MW/595.3MWh was awarded 13 billion yen through Tokyo's FY2024 subsidy for promoting grid-scale battery storage, the metropolitan ...

With curtilment rates of 30% and higher for renewable project owners and dire congestion issues in the northern and southernmost regions of Hokkaido and Kyushu, the ...

Details Battery Storage Subsidies in Japan Introduction In the Sixth Strategic Energy Plan, published by the Japanese Government in October 2021, targets are set to (a) ...
