

Jersey hybrid battery systems

What is New Jersey's Electric and hybrid vehicle battery management act?

New Jersey's Electric and Hybrid Vehicle Battery Management Act requires producers of certain electric and hybrid vehicle propulsion batteries, including lithium-ion and nickel-metal hybrid batteries, to register with the New Jersey Department of Environmental Protection (NJ DEP) by January 8, 2025.

Will New Jersey's EV battery law be a template for other states?

While New Jersey's law is the first EPR policy to address EV batteries, it could likely serve as a template for other state or federal regulations on EV batteries as the market for them expands. Stay tuned here for more developments.

Does New Jersey have a battery stewardship law?

New Jersey's law also follows other states implementing similar laws for different types of batteries. In 2021, Washington, DC enacted an EPR law for rechargeable and primary batteries. Battery manufacturers began joining approved battery stewardship programs and submitting compliance plans in 2023.

When do covered batteries have to be labeled in New Jersey?

Starting January 1, 2027, covered batteries sold in New Jersey must include a permanent label providing information to be specified through program regulations. Battery collection and disposal restrictions take effect on January 8, 2027, including a ban on unauthorized disposal of covered batteries as solid waste.

New Jersey Governor Phil Murphy signed S3723, the Electric and Hybrid Vehicle Battery Management Act, into law Jan. 8. The extended producer responsibility (EPR) bill requires battery producers to create and ...

Turn the vehicle off, then pop the hood and open the trunk. You will find the hybrid battery in the trunk near the spare tire. On the hybrid battery, there is an orange safety interlock switch. Remove this by sliding the handle toward the left side of the vehicle, then pulling out. Next, make your way to the hood and open the fuse box.
