Johnson Controls was one of the first organizations to develop a solution to improve water efficiency through performance-based contracts. These solutions started with water loss reduction through comprehensive water utility metering replacement projects and have extended through leak detection and reduction, wastewater energy efficiency, and biogas utilization.

Appreciate one-stop solutions for some of the most challenging problems facing water and wastewater utilities and industrial users. All from Johnson Controls - one of the first companies to create a solution that improves water efficiency through performance-based contracts. When we work with you, we know that every system is different.

In the initial phase, Johnson Controls installed four 100-kilowatt (kW) solar photovoltaic (PV) arrays at City Hall, the La Crosse Center, the main public library and the Municipal Service Center. Solar technologies convert sunlight into electrical energy and this energy will be used to create city-owned clean energy resources.
