Batteries of included appliances must also meet this standard. For PAYG systems, appropriate battery protection must remain active regardless of whether the system is in an enabled or disabled state.

Protecting Consumers ...the up-front costs of a solar lantern - let alone a Solar Home System - are comparatively high, and most consumers simply cannot afford to purchase something that does not meet expectations, or is prone to early breakage. Meg Harper, Lighting Global Research Engineer Off-grid lighting and energy products offer consumers many advantages

Nairobi, 8 October 2024--Off-grid solar is the most cost-effective way to power 41% of people globally by 2030 who are still living without energy access. The sector already provided 55% of the new connections in sub-Saharan Africa between 2020 to 2022 - where over 80% of the unelectrified population lives. The latest Off-Grid Solar Market Trends

Lighting Global, the World Bank Group's platform for developing the off-grid market to help people with no access to electricity, has partnered with the United Nations Foundation to organize a webinar on the international quality assurance framework for off-grid solar lighting products, and its application to bulk procurement of solar lighting devices for use in

Lighting Global is the World Bank Group's platform to support sustainable growth of the international off-grid solar market as a means of rapidly increasing energy access to the more than 1.1 billion people worldwide who presently live without access to affordable, reliable and safe modern energy. Lighting Global supports the country program work of Lighting

Ce document décrit les Normes de qualité des kits de système solaire domestique, une suite des références qui tablit un ensemble des niveaux de base de qualité,

durabilité, et de la publicité; non mensonger pour protéger les consommateurs. Ces Normes appliquent aux produits qui ont une puissance crête jusqu'au 350 W et une tension continue

Please email us at qa@lightingglobal with any questions or comments. We are happy to review consumer-facing documentation at any time to determine whether it meets the Lighting Global Quality Standards.

This note summarizes a report prepared by Lighting Africa to identify key policy barriers to the adoption of modern off-grid lighting products and services in Ethiopia, and offers recommendations for their mitigation. Key barriers include insufficient recognition of off-grid lighting products as a complementary, interim option to grid-electricity access, high cost due to ...

The 2020 Off-Grid Solar Market Trends Report finds that the industry has made tremendous strides in the past decade. Since 2017, revenues from the off-grid solar industry continue to rapidly grow, increasing by 30 percent annually. To date, more than 180 million off-grid solar units have been sold worldwide and the sector saw \$1.5 billion in investments since ...

Nominations for the 2015-16 Global LEAP Awards Off-Grid Television and Off-Grid Fan competitions are now open, and close 15 th January 2016. The Global LEAP Awards are the best way to send signals to the off-grid market about appliance quality and energy efficiency. Winners and Finalists of the inaugural Global LEAP Awards have benefited from significant ...

Lighting Global is part of the World Bank Group's contribution to Sustainable Energy for All (SEforAll). Lighting Global is managed by the Energy Sector Management Assistance Program (ESMAP) and financed by ESMAP's donors, and others. We work with World Bank task teams on the development of lending operations in the off-grid energy sector, and in close partnership ...

A new report, Designing Responsible End-User Subsidies for Energy Access: A toolkit featuring case studies for the design of subsidies in off-grid solar and clean cooking, was just released. Produced by Lighting Global / ESMAP, GOGLA, the Clean Cooking Alliance and EnDev, this toolkit stresses the need for responsibly designed end-user subsidies to close the

The IFC/World Bank-supported Lighting Global Quality Test Methodology has become the world standard for clean off-grid lighting products, following its incorporation into an International Electrotechnical Commission (IEC) technical specification in 2013. The Lighting Global team regularly updates the Quality Standards and Lighting Global policies to ensure that they ...

Lighting Global maintient les Normes de qualité, une suite des références qui tablent un ensemble des niveaux de base de qualité, durabilité, et de la publicité; non mensonger pour protéger les consommateurs. Ces Normes appliquent aux produits ayant une puissance jusqu'au 10 W inclus. [Remarque : Les produits ayant une puissance plus que 10W jusqu'au 350
