2019 (9) foresees studies on energy savings potentials of PV panels and inverters. In particular, a preparatory study on sustainable product policy instruments for the product group "solar fotovoltaic panels, inverters and systems" was launched in November 2017. The JRC.B5 unit is leading the study under an AA from DG GROW, with a specific

PVGIS can be used to calculate how much energy different kinds of fotovoltaic systems can be generated at any location in Europe and Africa, as well as a large part of Asia and America. Find out more about the PVGIS Tool .

The JRC was also project team member of four additional publications during 2019 (see section 2.3). JRC is the project leader for another two standards (IEC 60904-1 and IEC 60904-10) which are progressing through the standardisation process and has made contributions to 24 others (as part of the various project teams).
