

How can Kosovo improve its solar and wind power system?

As Kosovo increases the share of solar and wind, it will need to put far greater emphasis on power system integration and on other aspects such as real-time weather forecasting in order to better govern the transition while maintaining reliability.

How much solar power does Kosovo have?

With regard to solar power, Kosovo's installed capacity at the end of 2020 stood at 20,9MW, the bulk of which are sited at agricultural facilities throughout the country. However, a few recently announced solar power projects are poised to increase that number significantly.⁹

How will lignite affect Kosovo's power system?

While lignite has long been the bedrock of electricity supply in Kosovo, the future operation of the electricity system will rely more heavily on renewables such as solar and wind power. This has important implications for power system development, as well as for power system planning.

Can pumped hydro storage be used in Kosovo?

In Kosovo's case, the use of pumped hydro storage could potentially be feasible, but given the range of flexibility options available, it should not be considered necessary to achieving Kosovo's overall energy transition objectives.

How can development finance support solar PV projects in Kosovo?

Many of the solar PV projects currently being developed in Kosovo have benefitted from support from development finance institutions such as the EBRD or the IFC. Indeed, the role of DFIs has arguably been instrumental in helping catalyse investment, and in building other lenders' confidence in providing loans to the sector.

Can Kosovo transform its energy system to a lower carbon paradigm?

In this regard, the Republic of Kosovo stands at a crossroads: as a small, landlocked country in the heart of South East Europe, it has tremendous potential to transform its energy system toward a lower carbon paradigm.

systems. PRM Energy Systems, Inc. (PRME) in Hot Springs, Arkansas has provided energy solutions for over twenty years. PRME serves private and public power producers on five continents. The company's mission is to continue to provide customers with the most reliable, efficient, and economical energy solutions available. Currently, the

A comparison between Kosovo energy system operating states S 5 and S 7 with a 70 % share of heat pumps for individual heating in a coal-based energy system with 100 % flexible TPPs shows that the power system can additionally integrate 175 MW wind and 43 MW PV, respectively.
