

Kyrgyzstan big sun energy

Does Kyrgyzstan have solar energy?

Kyrgyzstan's geographic location and climatic conditions are quite favourable for the broader development of solar energy, evident in solar radiation maps.

Does Kyrgyz Republic have solar energy?

Researchers have determined there is potential for solar energy in the Kyrgyz Republic. The country's geography and climate favor solar energy: 94 percent of the territory is highlands with altitude varying from 800 to more than 4,000 meters above sea level, with an annual average of 260 sunny days.

How much energy does Kyrgyzstan have?

The energy potential of the rivers of Kyrgyzstan ranges from 140 to 160 billion kWh per year. However, the presence of a large amount of hydropower potential does not indicate the self-sufficiency of energy resources in the country.

Who can use biogas & solar energy in Kyrgyz Republic?

Biogas and solar energy can be used by farmers, dairy farms, farms, bathhouses, laundries, mini markets, etc. In case of the Kyrgyz Republic, this experience can be applied via providing loans for rural households to purchase biogas generators or solar panels.

How to improve energy sector in Kyrgyz Republic?

Taking into account the current state of energy sector in the Kyrgyz Republic, its challenging issues, the following recommendations can be provided. Wide media coverage of the energy sector, conduct information campaign in order to disseminate important policy issues. Promotion of green economy concept.

Who is kyrgyzgosenergoholding?

After getting independence by the country, on the basis of existing energy facilities in 1993 the "Kyrgyzgosenergoholding" company was established that performed its activities on the self-supporting principle and consisted of 16 different enterprises involved in the production, transmission and distribution of electricity and heating energy.
