Phoumin, H. (2020), "Introduction", in ERIA and Lao PDR Ministry of Energy and Mines, Lao PDR Energy Outlook 2020. ERIA Research Project Report FY2018 no.19, Jakarta: ERIA, pp.1-5. 1 Chapter 1 Introduction Han Phoumin 1.1 ackground The Lao People"s Democratic Republic (Lao PDR) is in the middle of the Southeast Asian ...

This strategy aims to develop new renewable energy resources which are not yet widely explored in Lao PDR to replace resources that will be exhausted in the future, also known as "non-renewable energy" (fossil fuels, coal, natural gas etc). These renewable energy resources comprise biomass energy (biofuels, biogas, ...); solar energy; wind; small hydropower.

In July, the Ministry of Energy and Mines hosted the country"s second Lao Electric Vehicle (EV) Forum, with funding support from the United States Agency for International Development (USAID) in partnership with the Lao Automotive Industry Association. The event, which featured industry leaders and government officials, highlights Laos" growing ...

Household electrification is also an important aspect of Lao energy policy. The Power Sector Policy and Targets for 2020 outlined the target of 90% electrification rate by 2020. With abundant hydropower resources, the development of hydropower constitutes another key area. The Law on Water and Water Resources (1996) sets

The Lao PDR"s total final energy consumption (TFEC) grew by 2.7% from 2010 to 2018 (Figure 10.1). Electricity grew the fastest at 10.5% per year, followed by petroleum products at 7.3%. Biomass consumption, which has the highest share in the TFEC, decreased at an average rate

This article will explore the current trends in Laos" energy market and provide an outlook on its future development. One of the key drivers of Laos" energy market growth is the country"s vast hydropower potential.

(KPLVNA) - Lao Deputy Minister of Energy and Mines ChansaVath Bounpha has affirmed that energy transition with the use of hydrogen ammonia energy as clean energy to replace current sources is essential for Laos. Speaking at a recent workshop on energy transition and the possibility of use of hydrogen-ammonia in Laos, she said that countries ...

Laos laor energy

Loas is a land-locked country in the South Asia. In terms of energy generation from renewable energy sources, 56% of energy comes from hydro, 22% from biogas, 11% from solar and the remaining 11% from biomass. Therefore, ...

OverviewOther renewable energy resourcesFossil fuelHydropowerNatural history of the Mekong River basinEnvironmental effects of hydropowerPower companiesSee alsoAside from large-scale hydro power, Laos has also significant small-scale hydro and solar energy potential. Laos adopted the Renewable Energy Development Strategy in 2011 and set a target of 30% small-scale renewable energy in the energy production by 2025; to achieve the target Laos could improve renewable energy governance, adopt a feed-in tariff, build an effective regulatory framework and facilitate market entry for foreign investors.

On November 21, 2024, in a pioneering effort to create career opportunities for women in the energy sector, the Lao Youth Union and local social-enterprise STELLA, with support from the United States Agency for International Development (USAID), officially launched the Lao Women in Energy Scholarship and Professional Development Program.

Lao Total Energy Consumption. Energy consumption is relatively low at 0.74 toe/capita (vs around 1.8 toe/capita in Thailand), including around 1 150 kWh of electricity (2021). Graph: CONSUMPTION TRENDS BY ENERGY SOURCE (Mtoe) Total energy consumption rebounded by 2% in 2021 to 5.5 Mtoe, after a 5% drop in 2020. It surged between 2014 and 2017 ...
