How will Madagascar's new telecommunications project impact the world?

The project will also enable 3,400,000 new internet users and connect some 2,000 health centers and schools to renewable energy and digital services. " Access to energy and telecommunications are top priorities for our government. This project is fully aligned with our vision for the development of Madagascar.

How does the private sector provide energy and digital services in Madagascar?

With the exception of the national electricity company JIRAMA, energy and digital services in Madagascar are provided by the private sector. Low population densities and high poverty levels in most of the underserved areas make it impossible for the private sector to deliver these services on a purely commercial basis.

How can The GoM lift Madagascar out of poverty?

Access to energy is a cornerstone of the GOM's efforts to lift Madagascar out of poverty. The objective is to double energy production within 5 years, increase access to electricity for at least 70 percent of the population by 2030, improve reliability of supply, and reduce energy prices.

Will Madagascar double its electricity access?

This support will be transformational for small business as well as for the individual households and citizens and will put Madagascar on the path to double its electricity access," said Marie-Chantal Uwanyiligira, World Bank Country Manager for Madagascar.

Does Madagascar have electricity?

Access to infrastructure in Madagascar, including electricity and digital, is among the lowest in Sub-Saharan Africa and in the world. An estimated 33.7% of the population has access to electricity, compared to an average of 48.4% for Sub-Saharan Africa in 2020.

How many people in Madagascar lack electricity?

Over 18 million people currently lack electricity access, placing Madagascar 13th in the list of countries with the largest unelectrified population worldwide. In terms of connectivity and accessibility of broadband services, despite progress in recent years, Madagascar ranks relatively low.

In Madagascar, only 10% of the rural population has access to electricity. This low level of coverage is partly due to the high cost for investment in improving and deploying the power ...
