Using a solar battery can help users to reduce the amount of electricity they would normally buy during peak hours. The battery can store the extra energy produced from solar panels during the day to avoid using electricity at a more expensive rate. The peak time-of-use (TOU) rates can be double the price compared to off-peak rates.

Globally, solar panel prices have fallen by around 20% every time the world's solar capacity doubled, a phenomenon known as the learning rate of solar energy technology. This trend has made solar panels more affordable for both residential and commercial installations in the Gulf, Saudi and Jeddah.
