

# Malaysia how much solar panel cost

How much does a solar panel installation cost in Malaysia?

A typical residential solar panel system in Malaysia is 6.6kW and a good quality installation will cost between RM18,500.00 up to RM30,000.00. But why the big difference in cost? Whether a 6.6kW system is an appropriate size installation for you or not is a good question and will depend on your electricity usage.

Can You DIY solar panels in Malaysia?

No. Installing a home solar system by doing-it-yourself might be appealing, but several factors discourage DIY solar panel installation in Malaysia: Solar panels in Malaysia are not readily available to the public. Procuring the required equipment may be challenging and could lead to higher costs and logistical hurdles.

What are the different types of solar panels in Malaysia?

Some of the common brand of solar panels in Malaysia include First Solar, Jinko, GCL, Hanwha. Another factor in the overall cost to install solar panels for your home is the inverter. For a really cost-sensitive installation you can find an unknown brand generic inverter but be careful because you'll get what you pay for.

Who are the best solar installers in Malaysia?

As for the best players in Malaysia, you've got Canadian Solar, Hanwha Q Cells, JA Solar, Jinko, and GCL. They're the go-to brands for many solar installers here. Here's a rough estimate of the standard system cost for landed property in Malaysia. Remember that installation costs also differ based on the factors mentioned above.

Can solar panels be installed on a roof in Malaysia?

In Malaysia, most roofs are suitable for solar panels, but the type and material of your roof will influence the mounting approach and panel positioning. Common roofing materials include tiles, metal, and asphalt. For roofs that are less accessible, additional scaffolding may be required, potentially affecting your solar panel installation costs.

Why are solar panels becoming popular in Malaysia?

Solar panels are becoming increasingly popular in Malaysian households as a way to reduce electricity costs and help the environment. Solar panels offer a sustainable, long-term solution for reducing electricity bills while contributing to a cleaner environment.

In Malaysia, commercial solar panels cost about RM1,800 to RM2,200 per kWp installed, with this range varying according to the system size. In most instances, as the solar photovoltaic (PV) system size increases, the price per kWp decreases. For example: Solar PV System Size. Rooftop Area (sqm) Price per kWp. Estimated Cost.
