For the same area on your roof you can generate 600-900W depending on the solar panels you use. With this in mind you can use a timer on a normal water heater and turn it on between 9am and 6pm, and then turn it on as needed. I personally use ewelink, but heard Tuya make decent smart relays as well.

Smart House Business. ... Since releasing our roofing incorporated Smart Solar/built in development product in 2011, we have also continued to work on home use photovoltaic generation systems. Please inquire here. Smart Solar ...

So in a typical solar installation, all the solar energy gets instantly exported to the grid and enmalta pay you a "feed in tariff" for it, and your house is powered from the grid and you pay normal electricity rates for that. This way there is nothing smart about the system, it just requires an extra meter for the feed-in and that's it.
