Mars Rock Group is a global innovator leading the way in the field of renewable energy and green technology. Our name draws inspiration from Mars rocks, symbolizing resilience, endurance, and continuous evolution-qualities that resonate throughout our corporate vision.

The striking rock formations, eroded river valleys and the narrow sandstone walls create the unusual landscape of the place, named due to its similarity to the red planet - Mars Canyon. The canyon covers the big area and consists of two main parts.

NASA's Perseverance rover discovered "leopard spots" on a reddish rock nicknamed "Cheyava Falls" in Mars' Jezero Crater in July 2024. Scientists think the spots may indicate that, billions of years ago, the chemical reactions in this rock could have supported microbial life; other explanations are being considered.
