What is the future of the Marshall Islands electricity system?

The future of the Marshall Islands electricity system depends on upgrading the electricity network, getting better at energy efficiency, and replacing diesel generation with renewable energy in the form of wind and solar. Most of all it depends on our people. Take a look at where we are headed.

What is the Marshall Islands electricity roadmap?

The Republic of the Marshall Islands is calling for ambitious action by all countries to reduce greenhouse gas emissions. We are leading the way by committing to net zero emissions by 2050, with significant milestones along the way. The Marshall Islands Electricity Roadmap presents costed, technically sound pathways to help achieve our NDC.

How can the Marshall Islands improve quality of life?

“An improved quality of life for the people of the Marshall Islands through clean, reliable, affordable, accessible, environmentally appropriate and sustainable energy services.” “The Republic of the Marshall Islands (RMI) submitted its second NDC in 2018 at COP 24 in Katowice, making it the first country in the world to do so.

Are the Marshall Islands' NDCs ambitious?

“The Republic of the Marshall Islands (RMI) submitted its second NDC in 2018 at COP 24 in Katowice, making it the first country in the world to do so. The revised NDC set binding targets of reducing greenhouse gas emissions by 32 percent below 2010 levels in or before 2025 and by 45 percent before 2030. Yes, our NDCs are very ambitious.
