

Mft energy Brazil

What is MFT energy's business model?

MFT Energy's business model is based on generating income from buying and selling power, gas and environmental, utilizing the volatility as best as possible. Our 2023-2024 growth strategy aims at capturing opportunities in existing markets, expanding into new geographies, and entering a new and related trading segment, environmental.

Why should you partner with MFT energy?

With MFT Energy's unique partner model, we empower entrepreneurs to become the best and make the most of their talent. We believe the most successful way to advance our business is to extend a sense of ownership to as many employees as possible.

Is MFT energy a risk management platform?

MFT Energy is built for all kinds of market sentiments - our trading engine is well prepared on a daily level for handling all market situations - but what we experienced in 2022 was extraordinary and, therefore, we have continuously invested in our risk management setup.

What regulations does MFT energy comply with?

MFT Energy's trading activities are primarily subject to European regulations such as REMIT, MAR, and EMIR and subject to certain provisions under MiFID II. These regulations set out rules on market abuse, transaction reporting, and risk mitigation.

Does MFT energy have a short-term focus?

MFT Energy is focused on short-term trading. The maturity of its financial instruments supports this short-term focus, as the instruments primarily mature within 12 months. Please refer to the 'Liquidity risk' section for an overview of the maturity of financial instruments.

Does MFT energy have credit risk?

A considerable part of MFT Energy's counterparts are covered by standard agreements. Such agreements contain regulations on credit, payment, and offsetting. This means that MFT Energy is less exposed to credit risk than if trading with fewer or no standardized terms.
