

How can Morocco improve its energy security?

As a net energy importer seeking to improve its energy security, Morocco has stepped up initiatives to achieve a level of domestic energy sovereignty. This includes following guidelines for transitioning to cleaner energy sources, with an emphasis on diversification.

How can Morocco transform its energy sector?

Morocco has embarked on an ambitious journey to transform its energy sector. This ambition is driven by the High Royal Orientations and has three key pillars: increasing renewable energy capacity, promoting energy efficiency, and fostering regional integration.

How is Morocco pursuing a resilient energy future?

Morocco is pursuing a resilient energy future through a multifaceted approach. This includes a strategic focus on renewable energy sources to accompany its energy transition, and the diversification of its energy mix to ensure a sustainable energy transition without compromising energy security.

What is the Moroccan natural gas roadmap?

The Natural Gas roadmap, currently under implementation, is guided by specific time objectives set by the Moroccan Ministry for Energy Transition and Sustainable Development. In the short term (up to 2025), the emphasis is on procurement, LNG, and onshore terminals.

What is Morocco's Energy Roadmap for 2019-2030?

Law 48-15: Regulates the electricity sector and establishes a National Electricity Regulatory Authority. Looking ahead, Morocco's roadmap for 2019-2030 outlined the addition of 4262 MW of capacity, primarily from renewables (99.5%). This includes specific targets for wind, concentrated solar power, solar photovoltaic, and biomass energy.

Why did Morocco prioritize natural gas?

Morocco's Natural Gas Strategy: A Bridge Fuel to Renewable Energy Morocco's decision to prioritize natural gas was not based solely on its transitional attributes but also took into account the opportunity costs. In fact, natural gas is favored because of its lower greenhouse gas (GHG) emissions compared to oil and coal (IEA, 2023).

NB North Energy is your partner for energy supply. We plan all aspects, including traditional energy generation such as wind, gas turbines and solar, but also special and forward-looking ...
