What is Myanmar Power Group?

Myanmar Power Group Company Limited (MPG) is a Power Solution Provider, specializing in the Uninterruptible Power Supply (UPS) industry since November 2017. Myanmar Power Group was founded by experienced engineers whose experience in the UPS field is over a decade to provide the best pre-sales and after-sales support to our valued customers.

What is the Myanmar power system efficiency and Resilience Project?

The Myanmar Power System Efficiency and Resilience Project will finance the upgrade to the Ywama gas-fired power plant, improving the availability and reliability of electricity services to consumers in the Yangon region.

How can Myanmar improve its power system?

Rebuilding Myanmar's power system will require establishing trust to develop the power sector. Developing solar PV can add incremental generating capacity in a relatively fast manner.

What is happening in Myanmar's power sector?

Myanmar's power sector has been severely affected by the ongoing political turmoil. The power sector has been spiralling downwards since 2021 with prolonged electricity blackouts throughout the country. Electricity generation has been declining, resulting in a widening power supply-demand gap.

Does Myanmar have a power supply gap?

Myanmar's power sector will likely continue to experience significant challenges. To sustain the current level of power supply would require adding 300-500 MW every year until 2030. Scenario analysis on the power supply-demand gap illustrates that available generating capacity is projected to not meet the growing demand.

Will increasing imports help ease the electricity supply shortages in Myanmar?

While increasing imports could help to ease the electricity supply shortages in Myanmar, it remains challenging under the current circumstances. Improving power sector financial viability and recovering customer confidence are critical for private sector capital mobilization to enhance the quality of electricity services.

The Myanmar Power System Efficiency and Resilience Project will finance the upgrade to the Ywama gas-fired power plant, improving the availability and reliability of electricity services to consumers in the Yangon region. Investments in the power plant and in transmission infrastructure will free-up electricity supply in the rest of the country ...

Our Uninterruptible Power Solutions (UPS) protect against mains power issues to ensure safe operation, protect people and reduce the risk of downtime and system failures. From oil and gas and transportation to utilities, nuclear power and other critical infrastructure, we provide rugged, fully reliable electrical power
