

National development and reform commission supports new energy storage technology

What are the Development Goals for new energy storage in China?

The plan specified development goals for new energy storage in China, by 2025, new energy storage technologies will step into a large-scale development period and meet the conditions for large-scale commercial applications.

How will new energy storage technologies develop by 2030?

By 2030, new energy storage technologies will develop in a market-oriented way. On March 21, the National Development and Reform Commission (NDRC) and the National Energy Administration of China issued the New Energy Storage Development Plan During China's "14th Five-Year Plan" Period.

What is the implementation plan for the development of new energy storage?

In January 2022, the National Development and Reform Commission and the National Energy Administration jointly issued the Implementation Plan for the Development of New Energy Storage during the 14th Five-Year Plan Period, emphasizing the fundamental role of new energy storage technologies in a new power system.

When will new energy storage development be introduced?

The commission said earlier it will introduce a plan for new energy storage development for 2021-25 and beyond, while local energy authorities should also make plans for the scale and project layout of new energy storage systems in their regions.

Will the energy storage industry thrive in the next stage?

The energy storage industry is going through a critical period of transition from the early commercial stage to development on a large scale. Whether it can thrive in the next stage depends on its economics.

Will China achieve full market-oriented development of new energy storage by 2030?

The country has vowed to realize the full market-oriented development of new energy storage by 2030, as part of efforts to boost renewable power consumption while ensuring stable operation of the electric grid system, a statement released by the National Development and Reform Commission and the National Energy Administration said.

The State Council Information Office invited officials from the National Development and Reform Commission to brief the media on promoting high-quality ...

This policy aims to establish a bidirectional vehicle-to-grid (V2G) system based on charging and swapping facilities, utilising the flexibility of EV batteries as controllable loads ...

National development and reform commission supports new energy storage technology

4 · China has achieved initial success in new infrastructure construction, which has greatly facilitated the country's social and economic development over the past decade, officials said ...

2 · The country will support the construction of major projects, with a key focus on implementing 102 key projects mapped out during the period of the 14th Five-Year Plan (2021 ...

China will implement a batch of demonstration projects featuring advanced green and low-carbon technologies, which will provide strong support in achieving its carbon ...

"China 2050 High Renewable Energy Penetration Scenario and Roadmap Study" analyzes how China can gradually phase out fossil energy, especially coal, from its leading role in China's ...

On June 5, the Guangdong Provincial Development and Reform Commission and the Guangdong Provincial Energy Bureau issued Measures to Promote the Development of ...

China has released an implementation guideline on strengthening the integration of new energy vehicles (NEVs) with the power grid, according to the National Development and ...

To further accelerate the development of energy storage, the National Development and Reform Commission said that in 10 years' time, the development of the energy storage industry will be ...

This support has been evident through the implementation of numerous favorable policies, including increased support in finance, taxation, and technology innovation, as well as ...

On February 9, China's National Development and Reform Commission (NDRC) and National Energy Agency (NEA) jointly published the Notice on Deepening Market-Based ...

BEIJING, Feb. 10 -- China is accelerating the market-oriented reform of its renewable power pricing system in a bid to build a new power system and promote the sustainable development ...

The NDRC, successor to the former State Development Planning Commission, directs industry policies, price reform, fixed-asset investment, and western development. It is also responsible ...

The National Development and Reform Commission, China's top economic regulator, in association with the National Energy Administration, on Wednesday unveiled the ...

The new energy storage technology route is still mainly lithium-ion battery energy storage, further enriching various technology routes and application scenarios, cultivating a number of pilot ...

National development and reform commission supports new energy storage technology

On January 6th, the National Development and Reform Commission (NDRC) and the National Energy Administration (NEA) issued a notice on the "Action Plan for ...

On July 18, CHN Energy held a meeting to release the research results of China Energy Outlook 2060. Participants included representatives from nearly 30 research ...

This project is approved by the National Development and Reform Commission (High-tech Development and Reform Commission [2019] NO. 180), in January 2019. The ...

The national development and Reform Commission and the National Energy Administration issued guidance on accelerating the development of new energy storage. This ...

On 15 July, national plans for energy storage were set out by the Chinese National Development and Reform Commission and National Energy Administration. The main ...

The action plan aims to support the rapid growth of renewable energy by expanding storage capacity, ensuring stable grid operations, and strengthening supply security.

The National Development and Reform Commission and the National Energy Administration issued the "Special Action Plan for the Large-scale Construction of New Energy Storage". The ...

The National Development and Reform Commission, Ministry of Science and Technology, Ministry of Water Resources, Ministry of Construction and Ministry of Agriculture ...

The National Development and Reform Commission and the National Energy Administration released: Hydrogen energy is clearly included in the "new energy storage";-Zhongke Jiahong ...

Previously, in February 2025, the National Development and Reform Commission (NDRC) and the National Energy Administration (NEA) issued Document No. 136, explicitly ...
