

National energy administration new energy storage policy document

What is the implementation plan for the development of new energy storage?

In January 2022, the National Development and Reform Commission and the National Energy Administration jointly issued the Implementation Plan for the Development of New Energy Storage during the 14th Five-Year Plan Period, emphasizing the fundamental role of new energy storage technologies in a new power system.

What is the 'guidance on accelerating the development of new energy storage'?

Since April 21, 2021, the National Development and Reform Commission and the National Energy Administration have issued the 'Guidance on Accelerating the Development of New Energy Storage (Draft for Solicitation of Comments)' (referred to as the 'Guidance'), which has given rise to the energy storage industry and even the energy industry.

What is the 'guidance' for the energy storage industry?

Based on the above analysis, as the first comprehensive policy document for the energy storage industry during the '14th Five-Year Plan' period, the 'Guidance' provided reassurance for the development of the industry.

When will new energy storage development be introduced?

The commission said earlier it will introduce a plan for new energy storage development for 2021-25 and beyond, while local energy authorities should also make plans for the scale and project layout of new energy storage systems in their regions.

Does the energy storage strategic plan address new policy actions?

This SRM does not address new policy actions, nor does it specify budgets and resources for future activities. This Energy Storage SRM responds to the Energy Storage Strategic Plan periodic update requirement of the Better Energy Storage Technology (BEST) section of the Energy Policy Act of 2020 (42 U.S.C. § 17232 (b) (5)).

What is new energy storage?

New energy storage refers to electricity storage processes that use electrochemical, compressed air, flywheel and supercapacitor systems but not pumped hydro, which uses water stored behind dams to generate electricity when needed.

This document was released by the National Development and Reform Commission and the National Energy Administration in February 2025. It emphasizes the ...

PVTIME - Recently, the National Development and Reform Commission (NDRC) of China and the National Energy Administration (NEA) of China released a document ...

National energy administration new energy storage policy document

On October 11, 2017, China released its first national-level guiding-policy document covering energy storage. The document, "Guiding Opinions on Promoting Energy Storage Technology ...

Based on a brief analysis of the global and Chinese energy storage markets in terms of size and future development, the publication delves into the relevant business models and cases of new ...

Technological innovations in new energy, hydropower, nuclear power, power transmission and transformation, and novel energy storage have accelerated, and the clean ...

Wang Hongzhi, member of the Party Leadership Group of the National Development and Reform Commission and Head of the National Energy Administration, ...

This marked the start of policy-driven market development for new energy storage in China. At Interact Analysis, we sorted through a variety of policies issued by ...

The notice clearly stipulates the cancellation of the mandatory energy storage policy for new energy projects, marking the exit of the administrative energy storage ...

Document 136 outlines the strong regulatory framework for energy storage that has been in place for the last two months, aimed at creating a new pricing mechanism for ...

The recent implementation of the energy storage market policy has marked a significant development in the industry. Earlier this year, the release of Document N...

In August 2024, the National Development and Reform Commission (NDRC), National Energy Administration (NEA), and National Data Administration (NDA) jointly released ...

?SMM Analysis?On February 9, 2025, the National Development and Reform Commission (NDRC) and the National Energy Administration jointly issued the "Notice on ...

The commission said earlier it will introduce a plan for new energy storage development for 2021-25 and beyond, while local energy authorities should also make plans ...

New energy storage (NES) is a crucial technology for effectively integrating distributed energy sources and achieving a low-carbon transformation in the power sector. Based on the data of ...

By 2025, China aims to bring the annual domestic energy production capacity to over 4.6 billion tonnes of standard coal, according to the plan jointly released by the National ...

Private enterprises will be encouraged to invest in the construction of distributed new energy projects, new

energy storage systems, virtual power plants, and smart microgrids, ...

On 15 July, national plans for energy storage were set out by the Chinese National Development and Reform Commission and National Energy Administration. The main ...

[National Energy Administration: Accelerate the innova energy storage]On July 26, 2023, the State New Office held a regular briefing on the policy of welcoming the peak summer energy ...

The guideline, jointly released by four authorities including the NDRC and the National Energy Administration, aims to give full play to NEVs" important role in ...

NDRC and the National Energy Administration of China ... On March 21, the National Development and Reform Commission (NDRC) and the National Energy Administration of ...

This SRM does not address new policy actions, nor does it specify budgets and resources for future activities. This Energy Storage SRM responds to the Energy Storage Strategic Plan ...

The policy adjustment of Document No. 136 marks the official exit of the administrative storage mechanism that has lasted for nearly 8 years, and the energy storage ...

China's National Energy Administration (NEA) released its 2024 energy work plan on Friday, laying out a roadmap aimed at bolstering the green and low-carbon transition of ...

The document aims to standardize the grid connection access of new energy storage and promote its efficient dispatch utilization, setting specific requirements for power ...

The National Energy Administration organized the first batch of pilot work for new-type power system construction. It proposed focusing on cutting-edge directions related to new ...
