

# New Zealand abrel solar power

How many solar installations are there in New Zealand in 2022?

In 2022, New Zealand had a record amount of distributed solar generation installed (68 MW). In the first few months of 2023, the rate of installation growth slowed somewhat.<sup>1</sup> However, distributed solar installations are expected to increase, with Transpower forecasting 535 MW by 2030.

Does New Zealand have solar power?

Solar power in New Zealand is increasing in capacity, despite no government subsidies or interventions being available. As of the end of April 2024, New Zealand has 420 MW of grid-connected photovoltaic (PV) solar power installed, of which 146 MW (35%) was installed in the last 12 months.

How much solar will New Zealand have in the next 12 months?

If current trends continue for distributed solar installations, of around 4 MW per month, the addition of these two large solar farms could see as much as 120 MW of new solar generation added in the next 12 months. This would increase New Zealand's solar capacity by nearly 50 percent.

Will the solar energy potential be a concern for NZ's solar growth?

Here is another proof that the solar energy potential will never be a concern for NZ's solar growth - the example of Germany. Germany has an average potential of 1088 kWh/m<sup>2</sup> (much lower than NZ). Until a few years ago, Germany was the world's leading country for solar installed capacity.

How can solar power help New Zealand?

We're working with the sector on New Zealand's renewable energy and low-emissions transition. We're responsible for the governance and regulation of New Zealand's electricity industry. Solar power can help you become more self-sufficient, reduce your carbon footprint and reduce your energy costs.

Is New Zealand ready for grid-scale solar?

In May 2020, the Ministry of Business, Innovation and Employment released a study that considered the economics of grid-scale solar and gave forecasts to 2060, showing that New Zealand has potential for gigawatts of grid-scale solar.

We have quotes from both solar zero and a solar panel installer (Harrison's) and solar zero have quoted us less panels than we would need to cover our power usage. Hubby reckons to buy outright and get the right amount of panels would be more of a ...

Commercial Solar. A Commercial Solar power system from Solar Power NZ will provide sustainable energy for your business, while reducing your annual power costs. If you run a commercial operation and use most of your electricity during the day talk to us about a custom solar power solution and start saving today!
