

On February 10, 2025, eight departments, including the Ministry of Industry and Information Technology (MIIT), issued the Action Program for High-Quality Development of the New ...

The Action Plan emphasizes addressing multi-dimensional safety technologies throughout the entire lifecycle and encourages new energy storage to participate in the ...

The 14th Five-year Plan is an important new window for the development of the energy storage industry, in which energy storage will become a key supporting technology for ...

Under the theme "Solar PV, Energy Storage Innovation, and Market Outlook," the forum brings together experts and industry leaders from Taiwan and abroad to explore breakthroughs in ...

This parallel session will delve into discussions on new energy storage supporting the construction of new power systems, the disruptive innovations and market ...

Chief Scientist of Jiangsu Provincial Key Laboratory of Solar Energy Science and Technology and Professor of Southeast University Energy Storage Joint ...

Chinese authorities unveiled several measures on Monday to promote the new-type energy storage manufacturing sector, as part of efforts to accelerate the development of ...

With the theme of "Digital Energy Empowering New Productivity," the forum focused on low-carbon development under the "dual carbon" goal, and delved deeply into the ...

- About NEESSC 2025 -2025 New Energy and Energy Storage System Control Summit Forum (NEESSC 2025) is hosted by Inner Mongolia University of Technology and ...

The exhibition brings together top manufacturers in new energy storage to create a collaborative platform for technology exchange, product display, and industry innovation. Various forums ...

The first World Energy Storage Conference kicked off on Nov 9 in Ningde, Fujian province. With the slogan Global Vision, Innovative Energy Storage, the conference aims to create a world ...

On October 15, the sub-forum forward-looking salon of the 7th Hongqiao Forum "New Energy Storage Driving Future Energy Transformation" was held in ...

The 9th (2024) International Energy Storage Technology, Equipment and Application Conference will invite policymakers, experts and scholars, leading enterprises, financial institutions, ...

With a concrete project sample, it echoes the macro topics of the forum and provides replicable and referenceable practical experience and methodologies for the ...

Energy storage products with high technical performance, strong safety assurance, and reasonable costs will be more competitive in the market and will also promote ...

With the continuous development of the industry, the scale of this summit will grow exponentially. It will bring together global energy storage first-line brands to create a high-end exchange ...

Then, this paper analyzes the existing problems of China's energy storage industry from the aspects of technical costs, standard system, benefit evaluation and related ...

22 · Gather battery cores and strengthen the industrial chain, jointly create a prosperous future with fluorine: Build a new energy ecosystem featuring coordinated development of ...

The conference and exhibition theme will focus on promoting the development of new energy storage and green, low-carbon innovation of new generation power equipment. ...

On April 26th, the New Battery Research Institute for the School of Materials and Energy at Guangdong University of Technology (GBRI) and Guangzhou Development District ...

Chief Scientist of Jiangsu Provincial Key Laboratory of Solar Energy Science and Technology and Professor of Southeast University Energy Storage Joint Research Center, Chair Professor of ...

Sustainable development emphasizes the disruption of traditional production methods and the use of innovation to drive structural transformation of the economy, industry and energy systems, ...
