How can solar power help New Zealand?

We're working with the sector on New Zealand's renewable energy and low-emissions transition. We're responsible for the governance and regulation of New Zealand's electricity industry. Solar power can help you become more self-sufficient, reduce your carbon footprint and reduce your energy costs.

Does New Zealand have solar power?

Solar power in New Zealand is increasing in capacity, despite no government subsidies or interventions being available. As of the end of April 2024, New Zealand has 420 MW of grid-connected photovoltaic (PV) solar power installed, of which 146 MW (35%) was installed in the last 12 months.

What is New Zealand's largest solar farm?

(Source: Supplied) Plans have been revealed for what's believed to be New Zealand's largest solar farm. The joint British-New Zealand venture has consent to build the 182ha Tauhei Solar Farm near Te Aroha in Waikato. Expected to start construction this year, it aims to provide power for the equivalent of 35,000 homes.

Will Tauhei solar farm be a big project in New Zealand?

Following this, construction was also expected to commence this year. Harmony Energy director Pete Grogan said, in a statement, the Tauhei Solar Farm would be a project that Waikato and the whole of New Zealand could be proud of.

How many solar panels can a New Zealand solar farm produce?

Subject to obtaining all necessary consents and approvals, the solar farm's approximately 330,000 solar panels would generate more than 270 GWh per year, enough renewable electricity to supply the equivalent of approximately 35,000 New Zealand homes. Is going solar a good idea in New Zealand?

Going solar helps the environment - it creates clean, green energy and is a great way to reduce your carbon footprint. Going solar demonstrates your commitment to sustainability and will help New Zealand achieve its target of net zero greenhouse gas emissions by 2050. Is your property suitable for solar?

This calculator estimates the solar energy that can be collected by a solar capture device at a given address, panel direction and slope within New Zealand. The capture might be with photovoltaic panels for electricity, a solar water heater, or just windows or building surfaces for passive solar heating.
