What is a cryogenic nitrogen storage tank?

Due to liquid nitrogen being a cryogenic liquid, the temperature difference between the product and the environment is significant. To keep this surrounding heat away from the product, cryogenic Nitrogen storage tank manufacturers makes special liquid nitrogen storage tank that can handle its requirements.

What types of nitrogen storage tanks can CK supply install?

CK Supply also can install and maintain bulk and micro-bulk nitrogen storage tanks. Our tanks range in size from 50 gallons to 11,000 gallons and beyond. With having five locations throughout Missouri and Illinois, we maintain consistent inventory of all cylinder types making exchanging empty cylinders quick and easy.

What happens if a liquid nitrogen storage tank has no relief vent?

If there is no relief vent, ice plugs can form on the neck of narrow storage vessels because LN<sub>2</sub> readily condenses water to form ice. As a result, pressure will build up in the storage tank. The main aim of a Cryogenic liquid Nitrogen storage tank is to keep the surrounding heat at bay as explained before.

What is nitrogen used for?

It can also be utilized as a purging agent to prevent contamination for piping and equipment. Similar to cryogenic storage and food and beverage, nitrogen is used to freeze and preserve pertinent objects; for healthcare, blood, tissue, and other specimens that need to be kept in good condition.

How do you store biological samples in liquid nitrogen?

Store biologic, genomic, and diagnostic samples in liquid nitrogen using liquid nitrogen storage equipment such as benchtop containers, tube and rack systems, storage systems, transport systems, vial systems, transfer vessels, and more.

Does CK supply offer custom-tailored orders for nitrogen gas cylinders?

CK Supply offers custom-tailored orders for nitrogen tanks, so you can always perform the service you need without having to worry about the quality, purity, or safety of your gas tank. CK Supply offers several options to meet your nitrogen gas cylinder needs.
