

Nokia energy Belize

How much does electricity cost in Belize?

Belize's utility rates are approximately \$0.22 per kilowatt-hour(kWh),lower than the Caribbean regional average of \$0.33/kWh because of existing renewable energy projects,but still high compared with U.S. mainland rates.

How many kilowatts can a private company generate in Belize?

Private entities are allowed to generate up to 75 kilowattsof power,after which licensing requirements apply. Almost half the energy in Belize comes from hydroelectric power and biomass.

How can Belize achieve a low-carbon community by 2033?

This strategy estab-lishes a framework for transitioning Belize's energy sector and recommends programs and action plans for achieving a low-carbon community by 2033 through improved energy efficiency and conservation measures as well as increased development of the country's renewable energy resources.

Where does the energy in Belize come from?

Almost half the energy in Belize comes from hydroelectric power and biomass. BEL purchases 71.5% of its electricity from five domestic independent power producers (IPPs) which produce much of the remaining energy--about 55.6%--of all the electrical needs of the country,and about 40% from a Mexican government-owned electric utility.

Does Belize use solar power?

Belize uses solar power on a smaller scale,with the Government having installed solar micro-grids and solar-powered streetlights in rural communities not yet connected to the national grid. The Government of Belize,along with Belize Electricity Limited (BEL),intends to launch a pilot project introducing electric vehicles.

Why is Belize included in this energy Snapshot series?

Although not an island nation,Belize is included in this energy snapshot series because of the small diesel systems used to power its islandsand the fact that it is a member of the Caribbean Community (CARICOM),an alliance of 15 Caribbean nations in the region.

Reliant is a proudly Belizean company dedicated to bringing price transparency, remote monitoring technology and dependability to the gas industry in Belize. We are currently supplying several customers including hotels and restaurants in Hopkins and the Placencia Peninsula

In his keynote address, Hon. Michel Chebat outlined the Ministry's ongoing efforts to drive Belize's clean energy agenda. He highlighted recent initiatives, including the partnership with the Saudi Fund for Development, where Belize secured a historic 77 million USD investment for a 60-megawatt utility-scale

Nokia's environmental focus area is especially salient to ongoing portfolio-wide energy efficiency initiatives as it stresses the company becoming an industry pacesetter in energy efficiency and circular practices. Nokia has set the bold science-based target to reduce the company's Scope 1, 2, and 3 GHG emissions by 50% between 2019 and 2030.

A major contributor to carbon emissions, today, is the energy sector. The negatives of fossil fuel-based power generation are well known. According to the International Energy Agency (IEA), "If today's energy infrastructure continues to operate as it has in the past, it would lock in by itself a temperature rise of 1.65°C."

Here at Nokia, we make technology to help the world act together and the Sustainable Energy Management project exemplifies that goal. Our digital toolset powered with Nokia Bell Labs technology can help stakeholders work together to achieve a greener future.
