The Northern Mariana Islands, a US commonwealth situated in the Western Pacific, presents unique challenges for technology and telecommunications due to its remote geography and sparse population. Spread over 14 islands and with a total population around 49,000, the distribution of residents is highly uneven, with the majority located on the island of Saipan.

The Liebert FDC remote distribution cabinet extends the functionality of the PDU by packaging 168 poles (four complete panelboards) in a stand-alone cabinet with a rack-sized footprint. Offers multiple voltage options, panelboard options and monitoring options and one, two or four inputs.

Liebert®; FPC Power Distribution Cabinet. Provides high quality, flexible power distribution for high-density data centers. It is engineered to combine the convenience and cost savings of a pre-packaged, factory-tested unit with the flexibility of a custom-tailored power system. This self-contained system provides power isolation, power ...

The influx of client/server rack equipment is changing the content of data centers. There are more devices than before, and they consume less power than their predecessors. Therefore most Power Distribution Units (PDUs) run out of circuit breaker poles before they run out of rated capacity. The Liebert RDC extends the functionality of the PDU by packaging 168 poles (four ...
