System flexibility is one of the key features of all MG products. Combine the RS High Performance Batteries together with one or more MG Masters and create a powerful system for a complete range of applications. The RS battery modules can be connected in series and in parallel to meet the required system voltage and capacity.

Explore high-performance energy storage solutions with Blue Marine's MG Energy Systems collection. Featuring advanced lithium-ion batteries and integrated energy systems, these products are designed for marine, RV, and off-grid applications. Known for their reliability, efficiency, and long lifespan, MG Energy Systems

The SmartLink MX is the smart link between all MG products and third party devices. The SmartLink collects and combines all battery and communication data in the MG battery system. As a result, third party devices in a system no longer need to collect data from multiple BMSs.

MG uses the latest lithium-ion chemistry in its battery systems. These are ideal for full-electric and hybrid ...

The slave BMS in each battery module communicates with an MG Master BMS. Via a galvanic isolated CAN-Bus the MG Master collects and monitors the status of all battery modules. If the measured values from a battery module exceed the limit, the MG Master will automatically take action to protect all of the connected battery modules.
