However, the IEA study for medium-duty ICE vehicles was based on gasoline-equivalent data. Given this discrepancy, it makes sense that Optony's lifecycle carbon analysis gives different results than seen in other publications. Finally, Optony found limited research available regarding electric heavy-duty vehicle lifecycle GHG emissions.

Optony is worked for the City of San Luis Obispo, CA to complete a fleet electrification study and charging infrastructure assessment for 200 assets and 10 domicile sites. This work involved a comprehensive vehicle transition plan across all City departments, charging infrastructure needs assessments for all domicile sites.

From 2018 through 2019, Optony conducted a detailed feasibility study and compatibility analysis for wind, solar, biomass, geothermal, small hydroelectric, and solar resources across the geographically and politically
