

Where is the photovoltaic (PV) market developing?

Figure 7. The photovoltaic (PV) market development in China, Germany, Japan and the USA from 1990 to 2017 (Data source: IEA. PVPS. National Survey Report of PV Power Applications). By the end of 2009, the cumulative PV installed capacity in China was only 300 MW.

Where did photovoltaic market development and incentive policy take place?

Annual photovoltaic (PV) market development and incentive policy in China, Germany, Japan and the United States (Data source: IEA policy database). Except for the USA, all other three countries launched national-scale FiT schemes. Figure 10 shows the annual PV market and incentive policy in China, Germany, Japan, and the USA from 1990 to 2016.

When did the NDRC start promoting the development of solar energy?

In July 2011, the National Development and Reform Commission (NDRC) announced a nationwide FiT policy for the development of solar PV energy (IEA/IRENA Renewables Policies Database, 2016). In August 2013, the NDRC issued a "notice on the role of price lever in promoting the healthy development of the PV industry".

How much of PV production capacity is aimed for export?

The production targets of the U.S. PV industry roadmap reveal that 70% of the production capacities are aimed for export. This series of efforts by the policy instruments facilitated expansion of the PV industry in the USA (IEA, 2003, 2011).
