Can Palestinians achieve 10 percent of electricity production from renewable sources?

The Palestinian Energy Authority issued a renewable energy strategy in 2012 that aims to gradually achieve 10 percent of electricity production from renewable sources by the end of 2020. According to the strategy, this goal can be achieved if certain prerequisites are attained.

How can Palestine reduce its reliance on imported energy carriers?

Palestine can reduce reliance on imported energy carriers by deployment of clean energy systems, especially solar, geothermal and biomass. Palestinian areas has large alternative energy potential which can be harnessed by a futuristic energy policy, large-scale investments and strategic assistance from neighbouring countries like Jordan and Egypt.

Who is most affected by environmental pollution in Palestine?

The majority of individuals exposed to enhanced concentrations of pollutants are women and young children. The Palestinian Energy Authority (PEA) published a 'General Renewable Energy Strategy' in 2012, aiming for 10% of total domestic energy production and 5% of total energy consumption to come from renewable sources by 2020.

Does Palestine have a potential for solar power?

The Palestinian territory has a high potential for solar power generation, as it receives around 3,000 hours of sunshine per year. As a result, the Palestinian Authority is looking to attract investments in the renewable energy sector. Inauguration of the solar power plant in a school in Beit Hanina, Jerusalem.

How much electricity does Palestine use?

Electricity supply and demand According to the Palestinian Central Bureau of Statistics (PCBS), the total electrical energy consumption in Palestine in 2019 was reported to be 5,929.5 GWh. This quantity is almost entirely imported from outside sources, mainly from the Israel Electric Corporation (IEC), as shown in Table 1.

How much does a Palestinian energy initiative cost?

Over half of the garbage produced in Palestine is organic and biodegradable. The energy initiative will be funded by the Palestinian Authority and is expected to cost around US\$9 million. Officials expect it to meet the needs of about 30 Palestinian villages. The plan is to use decomposing biomass from ZF landfill & convert it into energy.
