Producing energy from fossil fuels and hydroelectric power plants are Panama's main sources of energy. Fossil fuels account for 51.6% of Panama's electric energy production and 48.4% came from hydroelectric plants according to estimates from 2009. It isn't surprising that almost half of the electricity produced in Panama is hydroelectric ...

Panama: Energy intensity: how much energy does it use per unit of GDP? Click to open interactive version. Energy is a large contributor to CO 2 - the burning of fossil fuels accounts for around three-quarters of global greenhouse gas emissions. So, reducing energy consumption can inevitably help to reduce emissions.
