What is Panama's Plan Energético Nacional?

The PEN (Plan Energético Nacional) 2015-2050 aims to drastically increase the use of renewable energy in Panama to 70% of the country's energy mix. Panama aims to be carbon neutral by 2050, partially by emphasizing forest restoration to absorb CO2 emissions.

What is Panama's energy supply?

This page is part of Global Energy Monitor's Latin America Energy Portal. Panama currently relies on imported oil for the majority of its total energy supply. In the electrical sector, hydro energy also plays a key role, accounting for 43.9% of installed capacity and 67.2% of total generation as of 2020.

What percentage of Panamanians have reliable electricity?

While 94% of Panamanians have access to reliable electricity, rates of access in primarily indigenous areas are drastically different; in Comarca Ngäbe-Buglé, the percentage of households with reliable electricity drops to approximately 4%.

Is Panama phasing out diesel power plants?

Panama has committed to phasing out power plants that burn diesel or other heavy fuels by the end of 2023, with the decommissioned capacity to be replaced by the 670 MW Gatun power station, a natural gas plant scheduled to begin operations in 2024.

What does the SNE do in Panama?

The SNE (Secretaría Nacional de Energía) works under the office of Panama's President to move forward with energy related planning and policy. The Ministry of the Environment (Ministerio de Ambiente) is responsible for permitting and Environmental Impact Assessments.

Who is responsible for energy distribution in Panama?

Three distributors are responsible for energy distribution in Panama: ENSA, Edemet, and Edechi. Electricity is distributed via Panama's nationally interconnected system (SIN). Electricity prices are impacted by weather patterns because of Panama's use of hydropower.
