Panasonic Energy today announced that it has finalized preparations for mass production of the 4680 cylindrical automotive lithium-ion batteries, marking a much-anticipated breakthrough in the industry. The mass production is set to start after the final evaluation.

The company is promoting sustainability across the value chain as part of Panasonic Group's aim to achieve carbon neutrality across its operations by 2050. Panasonic Energy India Co. Ltd., founded in 1972, makes AA and AAA size manganese batteries in India and has a capacity of 500 million cells per year.

The Panasonic Energy Co., Ltd. is globally active in our dry battery business that supports everyday convenience and comfort, as well as our B2B business such as industrial batteries and automotive batteries that support social infrastructure across a broad area.

To weave energy into every corner of life, transforming it into a force as essential and enduring as the elements themselves. Partnering with kindred spirits, we aspire to cultivate a society where prosperity is attainable for all.

Panasonic energy Spain

An arm of Panasonic Group, Panasonic Energy focuses on developing, producing, and supplying high-performance lithium-ion batteries that power various applications, ranging from EVs to renewable energy storage solutions. Panasonic Energy's competitive edge is based on its use of artificial intelligence (AI) and other advanced technologies.
