

How platform economy development reaches energy supply with demand enterprise?

First, platform economy development reaches energy supply with demand enterprise through the online trading platform, connecting energy-saving projects and green technology, effectively matching the supply and demand information and optimizing energy resources allocation.

Why do we need a platform economy?

The reduction of transaction costs and the improvement of transaction efficiency enable the rapid prosperity of the platform economy. This also facilitates the smooth circulation of energy resources in regions with a high level of marketization, thereby narrowing the energy efficiency gap between various locations.

How does the platform economy affect energy utilization technologies?

Secondly, the platform economy also facilitates the networked and convenient trading of technologies, enhancing the free flow of energy utilization technologies between regions. This can effectively alleviate distortions in energy price signals, thereby promoting Pareto improvements in energy utilization technologies.

What is the EU-China Energy Platform & why is it important?

The platform also creates opportunities for political and policy exchange as well as new business prospects for innovative companies in energy sector. Presidents Juncker, Tusk, and Premier Li endorsed the implementation of the platform Li in the EU-China summit statement, 9 April 2019 and it was launched in Beijing on 15 May 2019.

What is platform economy development?

Platform economy development provides an efficient trading platform for green credit and green investment projects, reducing green financial development inequality among regions. On this basis, the reduction of green finance development inequality will alleviate energy efficiency inequality by promoting technological innovation integration.

Does China have a platform economy Development Index?

Based on the reality of China's platform economy development, this paper constructs an index system, which is impossible to accurately and comprehensively measure platform economy development level.

The EU-China energy cooperation platform is a practical tool that supports the energy dialogue and delivers on the specific objectives of EU-China bilateral energy cooperation. The EU Partnership Instrument, designed ...

The Ocean X platform, a result of collaboration between MingYang Smart Energy, Huangpu Wenchong Shipbuilding Company, and China State Shipbuilding Corporation, represents a significant achievement in

Platform energy China

modern engineering. A 1:10-scale prototype was tested in 2020, and by April 2024, the full-scale installation of the Ocean X platform was completed.

Enrui Zhang is the Deputy Team Leader of the EU-China Energy Cooperation Platform (ECECP III). With over ten years of experience, he has been a key figure in shaping international energy policies, contributing significantly to world-class initiatives such as the G20 Energy Efficiency Leading Program and the Memorandum for UK-China Clean Energy Cooperation, driving ...

China's pioneering role in solar energy. China's pivotal role in solar energy expansion is underscored by its massive investment and robust government support. Leading the world in solar production, China hosts several of the largest solar farms globally, including the notable Tengger Desert Solar Park, capable of powering 600,000 homes.

China-based Envision Energy says that its 5.5 MW /14 MWh grid forming energy storage demonstration platform is the first and biggest single-unit grid-forming energy storage system globally to ...

This paper introduces the China Energy & Environmental Policy Analysis (CEEPA) system. The core of CEEPA is a recursive dynamic computable general equilibrium model, in which the interactions among different agents in the macroeconomic system of China are described. The specific characteristics of Chinese labor market and energy market are ...

By using panel data from 30 regions in China spanning from 2013 to 2020, this study investigates the influence of platform economy development on energy efficiency in inequality through a two-way ...

China launched an intelligent energy system, the country's first "smart brain" able to realize the coordinated management of dozens of energy sources at the same time, in Beijing on Friday.

China is a formidable influence in the global arena of clean energy, setting the pace in the creation of supply chains while pioneering innovations in renewable technologies.. At a time when the threat of climate change prompts nations to revamp their approaches to energy, China's commitment through investments, manufacturing prowess and supportive policies ...

Sino-German Business Roundtable on High Temperature Heat Pumps On 16 May 2022, GIZ and China Heat Pump Alliance (CHPA) jointly organized the "Sino-German High Temperature Heat Pump Round Table" under the framework of the Sino-German Energy Partnership.

The company is also working with Hainan, an island province off China's southern coast, on a larger, longer-term project that would combine energy storage with solar and offshore wind turbines. Off-the-shelf EV Platform. CATL supplies batteries for more than a third of electric or hybrid vehicles globally.

EU-China Energy Monitor - 2024 October Issue - NEW. EU-China Energy Monitor - 2024 September Issue.

EU-China Energy Magazine - 2024 August Issue. EU-China Energy Monitor - 2024 July and August Issues. EU-China Energy Magazine - 2024 June Issue. EU-China Energy Monitor - 2024 June Issue. EU-China Energy Monitor - 2024 May Issue

Enrui Zhang is the Deputy Team Leader of the EU-China Energy Cooperation Platform (ECECP III). With over ten years of experience, he has been a key figure in shaping international energy policies, contributing significantly to world ...

While acknowledging the strategic value of Arctic energy resources for China's energy supply, this article argues that they also have a role in China's energy transition. Specifically, this study examines Arctic liquified natural gas (LNG), wind energy, and geothermal energy in China's green transition.

Last year, a range of energy-saving measures at the Qingdao plant yielded savings of almost 510 megawatt-hours. Three-quarters of these savings -- around 380 MWh -- were achieved with the help of the Energy Platform. Bosch has now installed the Energy Platform at 122 of its own plants and also offers it to other companies.

Company profile: DLSOFT is a company specializing in software development in the Internet + smart energy industry. Since its establishment, the company has been focusing on the energy industry and independently developed the "Internet + Smart Energy" comprehensive monitoring and management platform SE2000.

The platform is also expected to elevate the renewable energy integration rate to more than 98 percent, the company said. Tianshu One represents a pivotal moment in China's energy transformation journey and sets a global benchmark for the integration of smart technologies in the energy sector, the company added.

EU-China Energy Cooperation Platform was launched on 15 May 2019, to support the implementation of activities announced in the "Joint Statement on the Implementation of EU-China Energy Cooperation". The Joint Statement was signed during the 8th EU-China Energy Dialogue that was held in Brussels on 9th April between Commissioner for Climate ...

Key words: renewable energy /; wind power /; photovoltaic power /; hydrogen production /; comprehensive energy management platform; Abstract: Introduction Hydrogen energy is a kind of green and efficient energy, which can be converted into electric energy and thermal energy by many ways. Hydrogen production from renewable energy is an important ...

China's energy consumption per 10,000 RMB (Chinese dollar) (U.S. \$1,211) of GDP has fallen from the equivalent of 5.58 tons of standard coal in 1990 to 1.71 tons in 1999. Yet despite

By using panel data from 30 regions in China spanning from 2013 to 2020, this study investigates the influence of platform economy development on energy efficiency in inequality through a two-way fixed-effects model. The results show that (1) platform economy development can alleviate energy efficiency

Platform energy China

inequality between regions. ...

XRG and bp announced they have reached financial close and completed formation of their new joint venture (JV) and international natural gas platform - Arcius Energy. Announced in February 2024, the JV is 51% owned by bp and 49% by XRG, ADNOC's transformative energy investment company. The new joint venture will combine the pair's deep technical capabilities ...

China's Mingyang Smart Energy has put into operation what's said to be the world's largest single capacity floating wind platform, rated at 16.6 MW, at Qingzhou IV ...

Robin Zeng, the billionaire who set up battery giant CATL, has divulged grand plans to evolve into a green-energy provider - and slashing the cost of developing electric vehicles, an idea that could change the economics ...

China's nuclear energy sector is poised for significant growth, with plans for 20 GW of capacity by 2050. China, with its proven track record and advanced nuclear technology like the CAP1400 reactor, is a key partner in this endeavor. Learn more about the strategic advantages and economic benefit
